(% indicates changes from the previous corresponding period.)

	Net sales		Operating profit		Ordinary profit		Profit attributable to owners of parent		Basic earnings per share
	Millions of yen	%	Millions of yen	%	Millions of yen	%	Millions of yen	%	Yen
Full year	44,700	3.3	6,680	5.3	6,760	2.0	4,810	18.3	368.33

(Note) Revisions to the forecast of financial results most recently announced: None

\* **Notes**

(1) Significant changes in the scope of consolidation during the period: Yes

Newly included: 3 companies (GL Sciences (Shanghai) Laboratory Equipment Limited, TECHNO QUARTZ VIETNAM CO., LTD., JANUS SCIENTIFIC, INC.)

(2) Adoption of accounting treatment specific to the preparation of quarterly consolidated financial statements:  
None

(3) Changes in accounting policies, changes in accounting estimates, and retrospective restatement

- 1) Changes in accounting policies due to the revisions of accounting standards: None
- 2) Changes in accounting policies other than 1) above: None
- 3) Changes in accounting estimates: None
- 4) Retrospective restatement: None

(4) Number of issued shares (common shares)

1) Total number of issued shares at the end of the period (including treasury shares)

December 31, 2025	13,681,230 shares
March 31, 2025	13,681,230 shares

2) Number of treasury shares at the end of the period

December 31, 2025	616,090 shares
March 31, 2025	640,651 shares

3) Average number of shares outstanding during the period (cumulative from the beginning of the fiscal year)

Nine months ended December 31, 2025	13,056,960 shares
Nine months ended December 31, 2024	11,186,701 shares

\* Review of the Japanese-language originals of the attached consolidated quarterly financial statements by certified public accountants or an audit firm: None

\* Explanation of the proper use of financial results forecast and other notes

- The financial results forecast and other forward-looking statements contained in this document are based on information currently available to the Company and certain assumptions that are deemed reasonable, and do not constitute a promise that the Company will achieve them. Actual results may differ significantly from these statements due to various factors.
- Supplementary material on financial results will be posted on the TDnet and the Company's website.

## 1. Overview of Operating Results, etc.

### (1) Overview of Operating Results

The Japanese economy in the period under review (from April 1 to December 31, 2025) remained on a moderate recovery trend due to inbound demand and resilient personal consumption against the backdrop of an improved employment and income environment. However, future prospects remain unclear due to the apparent impact of U.S. trade policies on certain industries, as well as ongoing geopolitical risks, fluctuations in raw material prices and exchange rates, and other factors.

Under these economic circumstances, the Group is working to build up production capacity and enhance sales capabilities to achieve our goals based on “strategic investment for sustainable growth” and “growth strategy focused on business competitiveness” as the basic policy set forth in our new Medium-term Management Plan (from the fiscal year ended March 31, 2025 to the fiscal year ending March 31, 2027).

As a result, during the period under review, net sales were 32,996 million yen (up 6.4% year on year). In profit figures, operating profit was 4,633 million yen (up 2.6% year on year), ordinary profit was 5,230 million yen (up 6.5% year on year), and profit attributable to owners of parent was 3,523 million yen (up 21.0% year on year).

#### Status of individual segments

##### (Analytical Instruments Business)

In the Analytical Instruments Business, net sales rose year on year amid ongoing unclear prospects for the economy and international situation.

In Japan, net sales of consumables drove increased revenue. Consumables were favorable primarily for environmental analysis and pharmaceutical companies. By product category, beyond just columns for liquid chromatography, the Company secured stable sales for a wide range of products, including solid-phase extraction cartridges and gas chromatograph components. Regarding instruments, revenue declined slightly due to replacement demand for water quality analysis instruments being concentrated in the previous fiscal year, and the number of projects posted with regard to sales of equipment from other companies in the October to December period of this fiscal year being fewer compared to the previous fiscal year.

Overseas, net sales rose year on year despite the ongoing impact of stagnation in the Chinese economy, owing to generally steady sales in other regions. With a focus on columns for liquid chromatography, sales of columns for gas chromatograph components, solid-phase extraction cartridges and other consumables were brisk, and also contributing were higher sales of peripheral instruments related to gas chromatographs.

As a result, net sales for the period under review were 14,285 million yen (up 2.2% year on year) and operating profit was 1,317 million yen (up 3.5% year on year).

##### (Semiconductor Business)

In the semiconductor industry, while demand for personal computers, smartphones, and autonomous driving remains sluggish, certain segments are beginning to experience soaring device prices and a sense of scarcity against the backdrop of growing demand for generative AI-related products.

In such an environment, to uncover new demand with an eye toward further growth, the Semiconductor Business is promoting market expansion through developing and increasing sales of high-value-added products, and is making preparations to build a framework for greater production in Japan and overseas. Order backlog conditions trended toward recovery, and net sales continued to be firm.

As a result, net sales for the period under review were 17,409 million yen (up 10.5% year on year) and operating profit was 3,286 million yen (up 3.3% year on year).

#### (Automated Recognition Business)

In the Automated Recognition Business, development projects for multilevel car park systems and the introduction and sales of entry/exit management systems progressed steadily, and net sales increased year on year.

By product category, net sales of products integrated into instruments and finished products were sluggish due to the impact of decreased demand for protection and security applications that serve residential and commercial buildings. On the other hand, in other products for automated recognition, net sales exceeded the same period of the previous fiscal year owing to various system projects, construction and expansion, as well as steady sales of custom IC tags.

As a result, net sales for the period under review were 1,301 million yen (up 0.9% year on year) and operating profit was 9 million yen (down 75.6% year on year).

### (2) Overview of Financial Position

#### (Assets)

Current assets as of December 31, 2025 were 36,865 million yen (up 2,523 million yen compared to the end of the previous fiscal year) due to increases in cash and deposits, merchandise and finished goods, and raw materials and supplies. Non-current assets were 26,490 million yen (up 2,456 million yen compared to the end of the previous fiscal year) due to increases in buildings and structures and investment securities. As a result, total assets were 63,355 million yen (up 4,980 million yen compared to the end of the previous fiscal year).

#### (Liabilities)

Current liabilities as of December 31, 2025 were 11,250 million yen (up 1,360 million yen compared to the end of the previous fiscal year), attributable to an increase in short-term borrowings. Non-current liabilities were 5,073 million yen (up 994 million yen compared to the end of the previous fiscal year) due to increases in long-term borrowings and other non-current liabilities, despite a decrease in retirement benefit liability. As a result, total liabilities were 16,323 million yen (up 2,355 million yen compared to the end of the previous fiscal year).

#### (Net assets)

Total net assets as of December 31, 2025 were 47,031 million yen (up 2,624 million yen compared to the end of the previous fiscal year) due to increases in retained earnings and valuation difference on available-for-sale securities, despite decreases in capital surplus and foreign currency translation adjustment. The equity ratio was 74.2%.
