#### 1. Overview of Operating Results, etc.

The company was established on October 1, 2024, as a wholly-owing parent company of GL Sciences Inc. and Techno Quartz Inc. by means of a joint share transfer. Therefore, no comparison with the semi-annual period of the fiscal year ended March 31, 2025 has been done.

#### (1) Overview of Semi-annual Operating Results

The Japanese economy in the semi-annual period under review (from April 1 to September 30, 2025) continued on a moderate recovery trend due to expansion in inbound demand and resilient personal consumption against the backdrop of an improved employment and income environment. However, future prospects remain unclear due to the impact of soaring raw materials and energy prices in the context of an unstable international situation and rising concerns with regard to U.S. government trade policies, and other factors.

Under these economic circumstances, the Group is working to build up production capacity and enhance sales capabilities to achieve our goals based on "strategic investment for sustainable growth" and "growth strategy focused on business competitiveness" as the basic policy set forth in our new Mediumterm Management Plan (from the fiscal year ended March 31, 2025 to the fiscal year ending March 31, 2027).

As a result, during the semi-annual period under review, net sales were 21,383 million yen. In profit figures, operating profit was 2,846 million yen, ordinary profit was 3,225 million yen, and profit attributable to owners of parent was 2,160 million yen.

#### Status of individual segments

#### (Analytical Instruments Business)

The Analytical Instruments Business was able to secure steady net sales amid ongoing unclear prospects for the economy and international situation.

In Japan, sales of the Company's own instruments were sluggish, while sales of mass spectrometers, which are experiencing growing demand for PFAS analysis, performed well. Net sales of consumables remained firm in a wide range of products, not only for columns for liquid chromatography, but also for solid-phase extraction cartridges and gas chromatograph components.

Overseas, the Company promoted the expansion of our own products, particularly columns for liquid chromatography, which are our mainstay products, as well columns for gas chromatography, solid-phase extraction cartridges, and solid-phase extraction-related instruments. However, sales growth was sluggish for certain products in our lineup due to the impact of stagnation in the Chinese economy and declining demand in North America.

As a result, net sales for the semi-annual period under review were 8,989 million yen and operating profit was 643 million yen.

#### (Semiconductor Business)

In the semiconductor industry, while demand is expanding for products related to generative AI, demand for personal computers, smartphones, and autonomous driving remains slow, and the market as a whole is expected to begin improving from 2026 onward.

In the environment as stated above, to uncover new demand with an eye to the future and strengthen competitiveness, the Semiconductor Business is laying the groundwork for further growth by expanding the market through developing and increasing sales of high value-added products, and making preparations to build a framework for greater production in Japan and overseas. In line with changes in the market environment, the order backlog is continuing to return to normal levels, and net sales remained firm based on orders received to date.

As a result, net sales for the semi-annual period under review were 11,474 million yen and

operating profit was 2,162 million yen.

#### (Automated Recognition Business)

In the Automated Recognition Business, implementation and sales proceeded smoothly for management systems for chemical substances and UHF-based inventory management systems, resulting in steady growth in net sales.

By product category, net sales of products integrated into instruments and finished products were sluggish due to continued decreased demand for residential and commercial buildings. On the other hand, in other products for automated recognition, sales were steady for various system projects as well as for custom IC tags for residential use.

As a result, net sales for the semi-annual period under review were 919 million yen. In profit figures, the high proportion of low-profit-margin projects and increased investment in personnel aimed at future business expansion resulted in operating profit of 25 million yen.

## (2) Overview of Semi-annual Financial Position (Assets)

Current assets as of September 30, 2025 were 35,486 million yen (up 1,145 million yen compared to the end of the previous fiscal year) due to an increase in cash and deposits, despite a decrease in accounts receivable - trade. Non-current assets were 25,011 million yen (up 977 million yen compared to the end of the previous fiscal year) due to increases in buildings and structures and investment securities, despite a decrease in other non-current assets. As a result, total assets were 60,498 million yen (up 2,123 million yen compared to the end of the previous fiscal year).

#### (Liabilities)

Current liabilities as of September 30, 2025 were 10,738 million yen (up 848 million yen compared to the end of the previous fiscal year), attributable to an increase in short-term borrowings. Non-current liabilities were 4,589 million yen (up 511 million yen compared to the end of the previous fiscal year) due to increases in long-term borrowings and other non-current liabilities, despite a decrease in retirement benefit liability. As a result, total liabilities were 15,328 million yen (up 1,360 million yen compared to the end of the previous fiscal year).

#### (Net assets)

Total net assets as of September 30, 2025 were 45,169 million yen (up 762 million yen compared to the end of the previous fiscal year) due to increases in retained earnings and valuation difference on available-forsale securities, despite decreases in capital surplus and foreign currency translation adjustment. The equity ratio was 74.7 %.
